Mr. B. Sambasiva Rao, Jr. Asst., Office

## EDITORIAL

TEC PANORAMA, the Campus letter, is now in your hands. It is the brain child of our beloved Principal. We are extremely happy to have it released on this Republic Day.

A campus letter is not a mere letter. It is an introduction to the college as well as a mirror reflecting campus activities. Also, it is a connect to the academic world and a means of rapport between the teacher and the taught. It is a mini-album, too, which may make you smile and wonder at your own images. It may as well provide an impetus to you to do something noteworthy and stand out among others. It is also predictive of events around the corner. In short, it is many-in-one. Preserve a copy of it for a future day when it will take you back into time and make you sweetly nostalgic. The letter will be brought out twice a year. Efforts will be made to make it the cynosure of all eyes. Suggestions are always welcome.

Cheers to you on this happy occasion .

*- Editor-in-chief*

## Message

**Dr.Y.V.Narayana**  
Principal, TEC

It is a privilege conferred on me to preside over the destinies of Tirumala Engineering College. I am aware what challenging tasks await a founder principal. It would be my responsibility to break paths afresh which can be securely trod later.

The institute, though at an incipient stage, has all the accretions of any established college. The Management, too, is receptive to innovative ideas and responsive to the needs of the staff and the student community. An instance of this is, as nowhere else, provision has been made for imparting communicative and other soft skills during the second and third years of B.Tech. An experienced lecturer in English is entrusted with the charge. Such is the generosity of the Management that a staggering sum of Rs. 60 Lakh from their own coffers, is set apart for student scholarships. This is really something unprecedented. Commuting staff are provided with a free lift in the brand new buses of the college. As part of a Rs.5 Lakh water scheme, three units of mineral water have already been erected at a cost of Rs.1 Lakh. Centralized A/c is another rare amenity. As playfields are still in the making, a variety of indoor games are made accessible.

Measures to ensure student participation and involvement in curricular and co-curricular programs are under implementation. Interaction sessions between the teachers and the taught are held periodically for each branch where the participants can open out their minds. The feedback received is promptly attended to. Discipline committees are constituted to check untoward tendencies, if any.

I am extremely happy about the cooperation extended by the Management, staff and students. The half-yearly campus letter which is now in your hands is meant to be a conduit of information. This will be giving you an insight into the campus programmes. I earnestly believe that this Institute will achieve several breakthroughs in its march of progress.
